STUDENT PROJECTS

MAJOR PROJECT PLAN

Department:	CSE	Semester:	8	Academic Year:	2024– 25

A. Proposed Title of the Project: Facial Analysis Powered Virtual Healthcare

B. Name(s) of guide(s):Prof. Thapaswini P S

C. Name of Team Members (Strictly not more than four students in a batch):

USN	Name	
4VP21CS106	**Thanmayee J**	Team Leader
4VP21CS078	**Sameeksha**	Team Member
4VP21CS105	**Swasthika Rai B S**	Team Member
4VP22CS406	**Pooja A**	Team Member

D. Date of commencement of project: 13-02-2025

E. Probable date of completion of the project: 20-05-2025

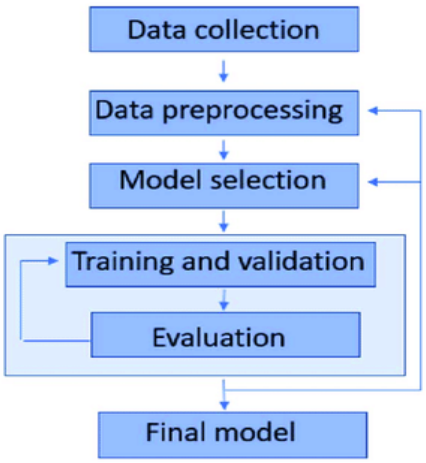
F. If this project is an **improvement / extension** of an earlier project; please give the title of earlier project and the year in which it was carried out. Specify the improvements / modifications clearly:

G. Objectives of the project highlighting its importance (not more than half a page):

- To detect and analyse face.
- To detect depression thoughts using facial emotions and voice assistant.
- To provide virtual communication using Chatbot functionalities.

H. Methodology (Not more than a page):

In this section, we will discuss the models and methodologies used by us for facial expression recognition. There are different data augmentations applied to provided dataset in order to increase the samples in the dataset. We have chosen different sets of parameters for optimizing the model and to improve the learning of the model. The methodology used in this study is depicted below.



STUDENT PROJECTS

I. Expected Outcome of the project:

- In this project it detects a person's face and analyzes their emotions to identify mental health.
- It also provides chatbot application which helps the patient to clear their queries.

Overall, this project is used for people who are willing for virtual healthcare support.

J. Application of the project:

- **Patient Identification and Record Management**: Face detection technology can accurately identify patients by matching their facial features with their medical records. This ensures correct patient identification and enhances patient safety.
- **Depression Detection & Monitoring** The system detects depressive emotions based on facial expressions and response patterns, allowing counsellors to track changes in mental health.
- **Chatbot for Mental Health Support**: After detecting possible depression, the system asks question and provides interaction for guidance .

K. Does the project proposed is relevant to any of the Industry or Institution in and around your area (Yes / No):	No
L. If Yes, Please provide details of the Industry / institution and contact details:	
M. Budget:	
Materials Cost: Labour Charges: Any other cost:	Source of Funds: Self Self / Industry / Others
N. Expected Completion Time:	
Expected Time for Major Activities	Schedule
Date of commencement of project: (Project team formation details submitted to Dept project coordinator)	18 /02/2025
Project Plan (Synopsis) submission to the Department	25/02/2025
Review of the Project Plan by Guide/Project Coordinators/HoD	25/02/2025 to 28/02/2025
Presentation 1: Presentation of Project Plan (Synopsis)	1th Week of March 2025
Submission of Progress report :Chapter 1: Introduction &Chapter2 Literature review / Requirements Specification and Analysis (soft copy)	18-04-2025
Major project Presentation 2: Introduction &literature review/Requirements Specification and Analysis, System Design & System Implementation with Demonstration (**30%** of practical work) and Internal Viva Voce	Between 4th Week of April 2025 to 1st Week of May 2025
Mini project Presentation 2: Results / System Design & System Implementation with Demonstration, Internal Viva Voce	Between 4th Week of April 2025 to 1st Week of May 2025
Submission of soft copy of Project Report	Before 10-05-2025

STUDENT PROJECTS

Date of completion of the **Mini project** / **Major project** report on Introduction &literature review/Requirements Specification and Analysis, System Design & System Implementation with Demonstration (**30%** of practical work)	20-05-2025
O. Authors:	
Student(s) / Author(s)	Signature with date
